

AMENDMENTS TO THE CLAIMS

The following listing of claims will replace all prior versions and listings of claims in the application.

LISTING OF CLAIMS

1.-51. (Cancelled)

52. (New) An anchor device for coupling an external device to a deck, said anchor device being received within an opening of the deck, said opening having an edge of the surface therein, said anchor device comprising:

an anchor body comprising a first body portion and a second body portion,

said first body portion having a structure including a first planar member disposed adjacent to an upper surface of the deck and having at least one dimension larger than the opening, said first body portion having a first lateral end and a second lateral end spaced longitudinally apart from the first lateral end;

said anchor body positioned at least partially within said opening so that a notch in the first lateral end of the first body portion receives the edge of the deck; and

a second planar member having the notch formed therein, said second planar member extending adjacent to the edge and adjacent to a lower surface of the deck,

said second body portion comprising a coupler extending outward from the opening, said coupler positioned adjacent to the second lateral end and opposite the first lateral end, said coupler coupling to the external device.

53. (New) An anchor device as recited in claim 52 wherein the structure comprises a unitary structure.

54. (New) An anchor device as recited in claim 52 wherein the notch comprises a generally U-shape notch.

55. (New) An anchor device as recited in claim 52 wherein the coupler comprises a first coupler and a second coupler.

56. (New) An anchor device as recited in claim 55 wherein said first coupler and said second coupler have a respective first coupling hole and a second coupling hole therethrough.

57. (New) An anchor device as recited in claim 56 wherein said first coupling hole and said second coupling hole are coaxial.
